

Sinclair Broadcasting's is forcing their stations to air an anti-Kerry propaganda advertisement days before the election. I believe this is a clear example of the dangers of media becoming a tool of propaganda, and not a news or public information service.

Sinclair uses the public airwaves free of charge, and is obligated by law to serve the public interest. It is not for large corporations that favor a candidate for their profit, to control and undermine our Democracy and the right of the people to free speech, and the free press.

Sincerely,  
Charles Finlay
